As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. ladder approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the adorable supports during the time in project.

Beside several mistakes we had made in the project, we hope to have more opportunities to widen our knowledge in web developing world.

We also thank you so much for your information and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 04.

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is a tool that brings everything in the world to you such as historic monuments information natural knowledge or skill in technology...

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back ***eprojects@aptech.ac.in*** as the assigned schedule.

Design Plan: Viruses (Vertex systems)	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 10-01-2022	Version 1.0	Page No: 1 of 25

Problem Definition

In recent times, there are various types of viruses that have attacked humans and they are also one of the most dangerous enemies that have caused major damage to mankind. However, the information about these viruses is still scattered and maybe not official. Developing a website with complete and relevant information about these viruses , therefore, is a very necessary task to do.

Given that, Vertex systems, our customers, wants us to develop a website with proper information about various viruses. To be specific, proper symptoms when they enter and attack human body systems, precautions and relevant cure (if available).

In the website which they demand is supposed to provide user friendly environment and navigation. Furthermore, the important menu must be stated in the top section of the webpage. A decent look out and color combination is also expected in developing website.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Website functions:

- The Home Page with some description about the Viruses and their types are provided. (Also navigational links are included.)

	Prepared by (Student)	Approved by (Faculty)

Design Plan: Viruses (Vertex systems)	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 10-01-2022	Version 1.0	Page No: 2 of 25

- The website provide information like “About us”, “Types of Virus”, “Year wise listing”, “Contact us”.

- Each section provide proper listing along with brief information.

- There are properly hyperlinked links and also images on website.

- Some facts and figures of the damage caused by the virus are also provided.

- Contact Us page flashes the address and location on map of the offices of Vertex Systems.

- Individual pages or sections for various viruses are provided with detailed information and images.

- Pages of viruses consist of various headings as “Year Originated”, “Location of Origin”, “Spread of Virus/Disease”, “Precautions required”, etc.

- All locations are displayed using Maps (Geolocation).

- Feedback taken on the information available on website.

*** User:**

- Users can access to pages of various viruses provided with detailed information and images.

- Friendly environment helps users to have a good experience.

- Users can easily find locations using Geolocation (Maps JS API).

- Feedback from users will be pleasantly taken.

Design Plan: Viruses (Vertex systems)	Document Name: Customer Requirements Specifications	SWD/Form No.02/CRS/Ver1.0
Effective Date: 10-01-2022	Version 1.0	Page No: 3 of 25

Customer Requirements Specifications

User:

Input:

- Information that relates viruses.
- Information about Vertex Systems and developer team.
- Feedback to webmaster.

Process:

- Check relevant information of viruses.
- Check information, address and office location of Vertex Systems and information of developer team.
- Check feedback from user.

Output:

- Display information of viruses that user input.
- Display information, address and office location of Vertex Systems and information of developer team.
- Successful / Failed feedback sent message.

Effective Date: 10-01-2022	Version 1.0	Page No: 4 of 25

Webmaster:

Input:

- Information of viruses that need to add/update/delete.
- Information of Vertex Systems and developer team that need to add/update/delete.
- Answer feedback from user.
- Delete inappropriate feedback from user.

Process:

- Add/update/delete information of viruses.
- Add/update/delete information of Vertex Systems and developer team.
- Check feedback answered from webmaster .
- Delete feedback.

Output:

- Successful / Failed added/updated/deleted information of viruses.
- Successful / Failed added/updated/deleted information of Vertex Systems and developer team.

Effective Date: 10-01-2022	Version 1.0	Page No: 5 of 25

- Successful / Failed feedback answered message.
- Successful / Failed feedback deleted message.

Hardware / software requirement:

Software:

- Notepad/HTML editor.
- Dreamweaver
- IE 5.0/ Netscape 6.0 or better browsers.

Hardware:

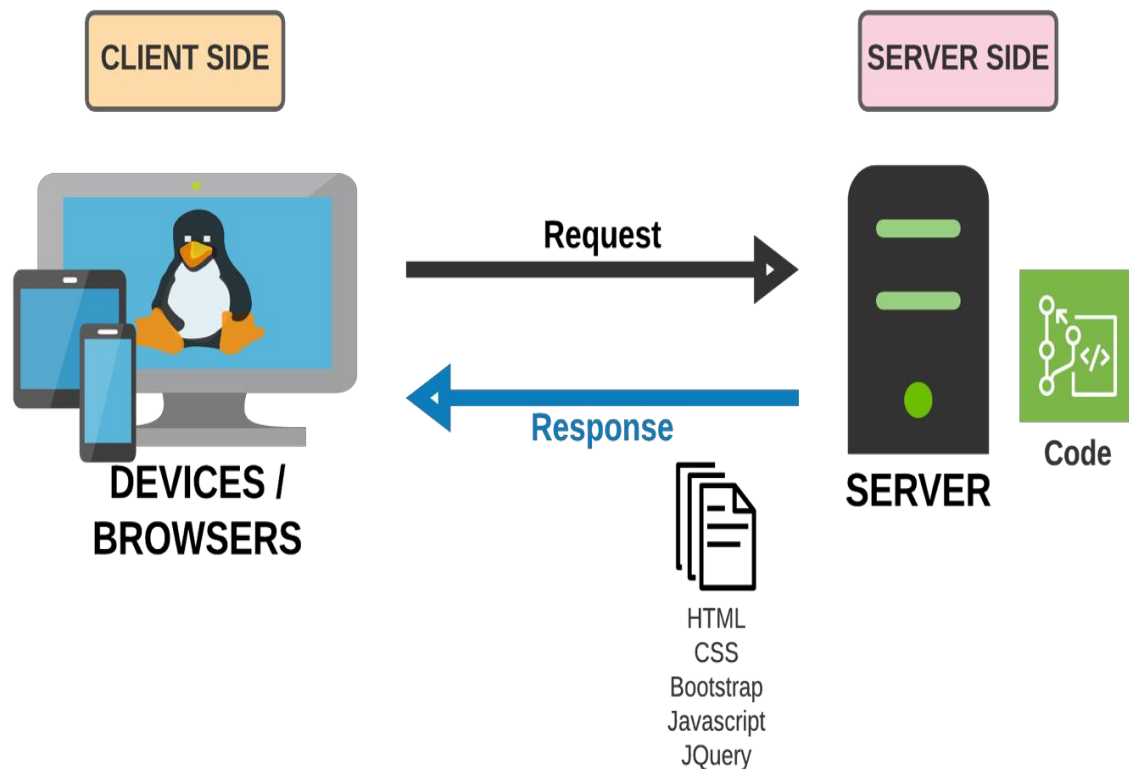

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better.
- 64 Megabytes of RAM or better.

Final checklist

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	
3	Are the GUI content devoid of spelling mistakes?	
4	Is the application user-friendly?	
5	Is the Website launching correctly in all popular browsers?	
6	Are all the forms validated with proper criteria?	
7	Do all text links lead to the appropriate website?	
8	Do all image links lead to the appropriate website?	
9	Are all the images and links clearly visible on the page?	
10	Does the Web page work properly in all the tested browsers?	
11	Does the Web page take too long to be loaded fully?	
12	Is the navigation sequences correct through all the Web pages on the site?	
13	Is the JavaScript code working as expected in all click events?	
14	Does the website match the information users are looking for?	
15	Is the operation on the website easy for users?	
16	Is the site satisfied with what you set out ?	
17	Is information on our website trustworthy ?
